

Perfect Purge

- **Fast, Affordable, & Reusable**
- **Available for 4" I.D.s and larger**
- **High temp options available**
 - **Up to 350°F (176°C)**

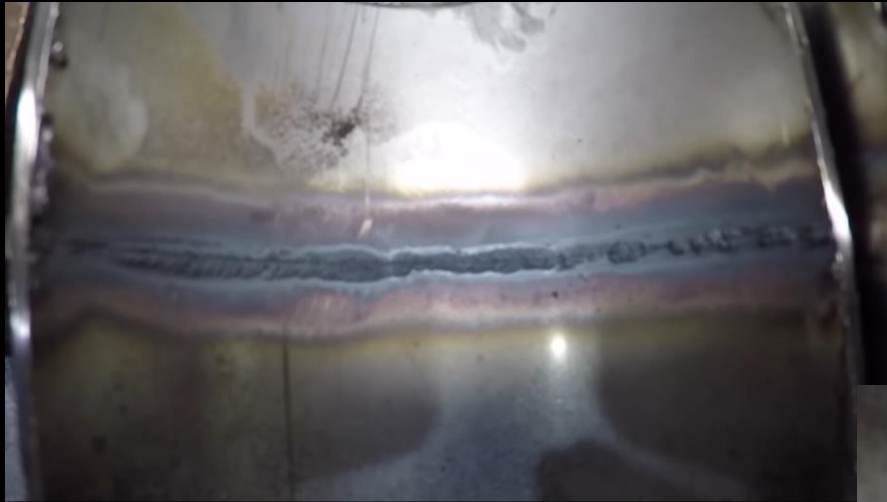

How Our Purge Dams Work

- Insert purge dam and a standard laminated Safe-T-Sponge on either side of weld
- Attach purge gas cylinder to fitting in order to replace atmospheric contamination
- Complete weld and remove once cooled

F.M.E. Benefits

- Cleaner welds = Lower FM risks

- “Sugaring” can lead to a weaker weld and QC failure
- Creates more debris when cleaning up the weld root

F.M.E. Benefits

- No more of this:

F.M.E. Benefits

- Our purge dams allow enough airflow to prevent blowback at the weld
